

Element Air™

A Division of RGF Environmental Group, Inc.

In-Duct Plus

A Photohydroionization® (PHI) Technology

Reduces airborne microbes by up to 99% 1 year warranty

REDUCES

- **Microbials**
- **Mold**
- **Bacteria**
- **Pathogens**
- **Odors/VOCs**

APPLICATIONS

- **Greenhouses**
- **Cultivation rooms**
- **Large harvest rooms**
- **Processing rooms**

Most facilities do not check the air for microorganisms on a daily or monthly basis. Bacteria and mold can continuously breed within the environment and on plants. RGF® developed this air treatment system to provide continuous protection in sensitive air spaces.

Air passes through a REME® / PHI oxidation chamber, which destroys airborne microbes with high intensity UV light rays targeted on a quad-metallic compound. The process develops a highly charged atmosphere of hydroxyl radicals, hydro-peroxides and super oxide ions. This atmosphere oxidizes contaminants in the air with friendly oxidizers. By friendly oxidizers, we mean oxidizers that revert back to oxygen and hydrogen after the oxidation process. No chemical residue or dangerous compounds are emitted from the system. The system can reduce levels of airborne microbes and odors by up to 99%. Airborne contaminants in the form of bacteria, mold, and yeast continue to be one of the least addressed issues in most facilities.
