

## Sunshine® Mix #4

### Product Description

Sunshine Mix #4 is a coarse mix suitable for a wide range of greenhouse crops and growing containers. It is designed for growers who desire increased drainage and air capacity. The product is a blend of select Canadian Sphagnum peat moss, horticultural perlite, dolomitic limestone, wetting agent and RESILIENCE®.

### Ingredients:

- Canadian Sphagnum Peat Moss
- Perlite
- Dolomitic Limestone
- Wetting Agent
- RESILIENCE®

### pH and EC Parameters

Parameter	Units	Typical Range	
		Lower	Upper
pH	–	5.4	6.5
EC	mS/cm	0.75	1.75

General pH range determined by 2:1 method. Mix pH represented above is after mix wet up. Mix pH is dependent on age and moisture content. Further testing is advised at time of use.

### General Physical Characteristics

Parameter	Units	Typical Range	
		Lower	Upper
Moisture	% wt.	40	55
Air Capacity	% vol	15	30
Water Capacity	% vol	40	60
Bulk Density	lb/cf	7.0	10.0

Test results represent the product for general reference only. Further testing should be done at time of use.

## Packaging

Product size	Units/Pallet	Fluffed volume	Weight (lbs.)
2.8 cu. ft. loose-fill	48		45-50
3.8 cu. ft. Compressed	30	7-10	70-80
55 cu. ft. Compressed	2	90-120	1150-1200
80 cu. ft. loose-fill	2		1000-1050
110 cu. ft. Compressed	1	180-220	2070-2400

NOTE: No guarantee of conformation is expressed or implied.

## Use Information

Loose fill product and compressed mix should be fluffed after removal from the package for maximum yield. The addition of a small amount of moisture during fluffing is advantageous. Avoid over mixing and over application of moisture that may result in degrading the blend structure. A sound nutritional program is recommended following planting.
